

PROCOR CHEMICALS, INC.

Technical Data Sheet PRO TightCeal™ M *Medium*

DESCRIPTION
PRO TightCeal™ is a blend of fibers designed to control seepage and loss circulation.

TYPICAL PROPERTIES		
Appearance	Blended fibers	
Specific gravity	1.2	
Typical particle diameter	medium	40-450 microns
Manufacturing	Compliant with ISO QA (Quality Assurance) testing standards.	
Moisture, %	10 max	
LC 50	441,000 ppm	

PERMEABILITY PLUGGING PERFORMANCE		
PPT tests were performed on PRO TightCeal™ M and a blank non-treated fluid at a 15 ppb concentration on multiple disks. These were tested at 250 F and 100 psi. The fluid in which it was tested was a standard Lignosulfonate mud.		
PPT FILTRATE, ML		
Micron	Blank	Medium
35	24	25
90	35	30
150	No control	29

PACKAGING
PRO TightCeal™ is packaged in 25 lb. sx./ 50 sxs. per pallet.
